NHK FM/82.8MHz

Make an evacuation route for your household!

In normal non-emergency times, make sure to check emergency contact information and write in evacuation routes to shelters. Check for areas of deep water, nearby shorelines, and dangerous areas on the disaster prevention map, and create a safe evacuation route. Practice walking the evacuation route with your family members.

Home evacuation Sites	Type of disaster	Evacuation Sites	Phone number
	For a flood / water damage		
	For an earthquake		
	For a landslide
